

## AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A portable communication apparatus, comprising:

- a) ~~a~~ a first housing including an open space and a pair of hinge supports, the open space having at least one opening, the hinge supports extending longitudinally and surrounding opposite sides of the open space;
- b) a hinge axis extending across the open space;
- e) a second housing including a first display, rotatably connected to the first housing to open from and close to the first housing; and
- d) a third housing including a second display, extending in a longitudinal direction of the second housing to be accommodated in the open space to enable the third housing to rotate about the hinge axis;

wherein the second display is always exposed regardless of ~~an~~ open and ~~close state~~ closed states of the second housing to the first housing.

2. (Currently Amended) The portable communication apparatus according to claim 1, wherein the first housing has an upper surface including a plurality of keys and a microphone, and ~~wherein~~ the second housing has ~~the~~ a lower surface including a speaker device.

3. (Original) The portable communication apparatus according to claim 1, wherein the third housing is integrally connected to the second housing.

4. (Currently Amended) The portable communication apparatus according to claim 1, wherein ~~the~~ a lower surface of the third housing protrudes from the lower surface of the second housing ~~in~~ with a stepped shape.

5. (Currently Amended) A portable communication apparatus, comprising:

- a) ~~a~~ a first housing including an open space and a pair of hinge supports, the open space having at ~~lest~~ least one opening, the hinge supports extending longitudinally and surrounding

opposite sides of the open space;

b) a hinge axis extending across the open space;

e) a second housing including a first display and a second display;

wherein said first display and said second display ~~are looked~~ face upward in the same direction, and said second display is always exposed regardless of ~~an~~ open and ~~close state~~ closed states of the second housing to the first housing.

6. (Currently Amended) The portable communication apparatus according to claim 5, wherein the first housing has an upper surface including a plurality of keys and a microphone, and ~~wherein~~ the second housing has ~~the~~ a lower surface including a speaker device.

7. (Currently Amended) The portable communication apparatus according to claim 5, wherein the ~~third housing~~ second display is integrally connected to the second housing.

8. (Currently Amended) The portable communication apparatus according to claim 5, wherein a bottom portion ~~the lower surface~~ of the ~~third~~ second housing protrudes from a top portion ~~the lower surface~~ of the second housing ~~in~~ with a stepped shape.
